Description

The product named SoyProFat MAX is a high-protein feedstock produced during the production of virgin soybean oil.

The "expeller" formed after the cleaning, extrusion and mechanical pressing of soybeans and - unlike the extracted soybean meal- contains 8,5% lecithin-rich soya oil and in addition contains easily digestible carbohydrates and protein. This makes the protein / energy ratio uniquely balanced.

Using

This feedstuff could be used without restriction for ruminants and monogastric animals.

Main parameters

Crude protein: 45,5%
Crude fat: 8,5%
Dry matter: min. 88%

Other

SoyProFat MAX is guaranteed to be made from GMO-free soybean.
Appearance: Yellowish-brown material, free of foreign matter.
